Description

Lighting to chapel and church ceiling

Dear sir,

Thank you for your time to meet on site 30/1/24. The following is an update of cost after discussing with your good selves. Note, please also refer to original quote and defects list.

Trinity Chapel lighting

A.

To rewire these light fitting locations using MICC with new PVC coating, paint after. Installation to blend into stonework.
To provide and fit 5 new 30w LED floodlights (black in column) and fit.

Main Church ceiling lighting

B.

To rewire 6no pendent light locations using MICC with PVC coating, paint after installation to blend into stonework.
To reuse existing light fittings, re lamp with LED lamps.
To rewire porch lights with MICC.

Note 1) We are not permitted by DNO to relocate meter or service fuse therefore these will stay in this location however new distribution board will be mounted at between 1.5m to 1.8m from the finished floor level.

Note 2) There are some existing PVC/PVC cables, which although do not meet the disclosure specification, these all remain and be connected to the new distribution board, tested. Please advise if you wish these to also be rewired in MICC.
